Our partnership with the german O-Scale leader and **Hobby 66**, its french distributor, actively continues.

The first 3D drawings of the future UIC Gs4-02 box car have been submitted to us but require many corrections. For this reason, we are not able to present you with any first injected parts or any sample for this exhibition. We regret it, but like the Gs4-01, the model must be in optimal quality!

MTH :

None information comes from Columbia about X3800 diesel motor unit or 241P steamer projects, despite the designs are finalized ... Hope remains! some items are in the way of being sold out like the 150X or the 141P of Noisy-le-Sec and Vénissieux. Only 3 pieces of each item are still available at the manufacturer warehouse (in 2 rail version).

A 150X steamer model will be available on site, and we could import any model of MTH range after the show. Delivery time and prices can be precized by phone call to 06.70.79.88.20.

SCHNELLENKAMP :

During Quai Zéro show, fans wishing to return the complete NEM / LENZ elongation couplers (2 plates and 2 hooks) and unused will be refunded of € 10.00. The clever design of the SCHNELLENKAMP device allows easy screwing under the floor of any wagon and some amateurs seek them.
