

CHREZO

MODÉLISME FERROVIAIRE

NEWSLETTER N° 23, October 2019

CHREZO'S REMOVAL !

Bonjour à tous,

While you enjoy a beautiful summer, CHREZO has moved to Royan, a quiet seaside resort located north of the Gironde estuary. Still no open store but a small and well arranged warehouse to accommodate our next productions 4 weeks before Rail-Expo, it is time to inform you about our current projects and what will be shown in Chartres from 22 to November 24th.

You will have no trouble finding our stand this year: it is located between that of the Cercle du Zero and that of French Tin Plate fans!

Enjoy your reading !

LENZ :

The Gs4-02 covered wagons are finally available at a price of 145 € on www.chrezo.fr.

Please, remind that the specific shell tool of this SNCF version of the UIC standard van has been produced by Lenz at our request. All models come with screw couplers to be fitted by the modeller.

The wagons benefit from a metal frame whose U-shaped profile is clearly visible, and all the doors and air flaps are mobile.

4 different items are available:

42247-01 : SNCF Gs4-02 first livery 1964 (125 manufactured pieces)

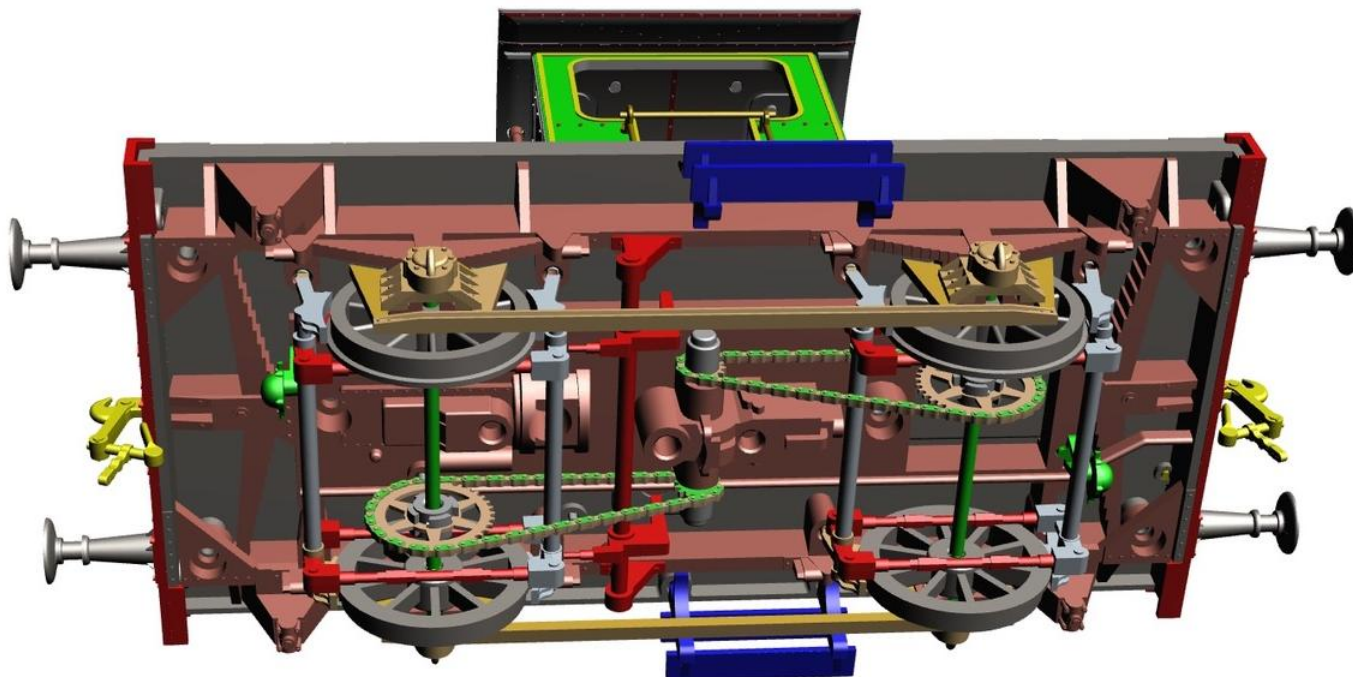

42247-02 : SNCF Gs4-02 Provence Express 1964 (125 manufactured pieces)

42247-03 : SNCF Gs4-02 UIC running numbers (1966-1980) (125 manufactured pieces)

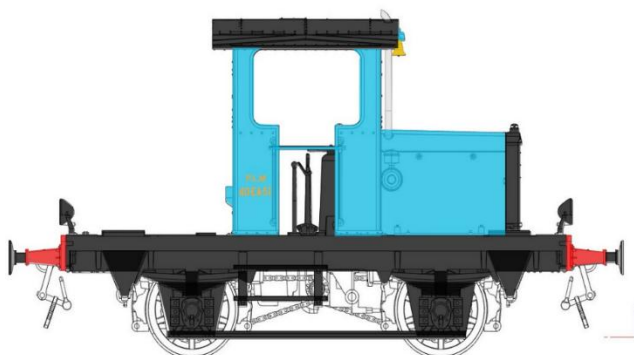

42247-90 : UIC red wagon, without lettering (75 manufactured pieces)

Don't hesitate to book and pick-up them if you visit Chartres exhibition. Shipping to E.U. costs 17€ .

IXO: the famous model cars brand will produce a Berliet RLCB shunter at the end of December (static model) , which looks like the Oignies Mine and Railway Museum preserved one. The undercarriage is very detailed:

CHREZO will benefit of the tools to sell two exclusive liveries, factory painted end lettered, at **25€ retail price** :

PLM 1924

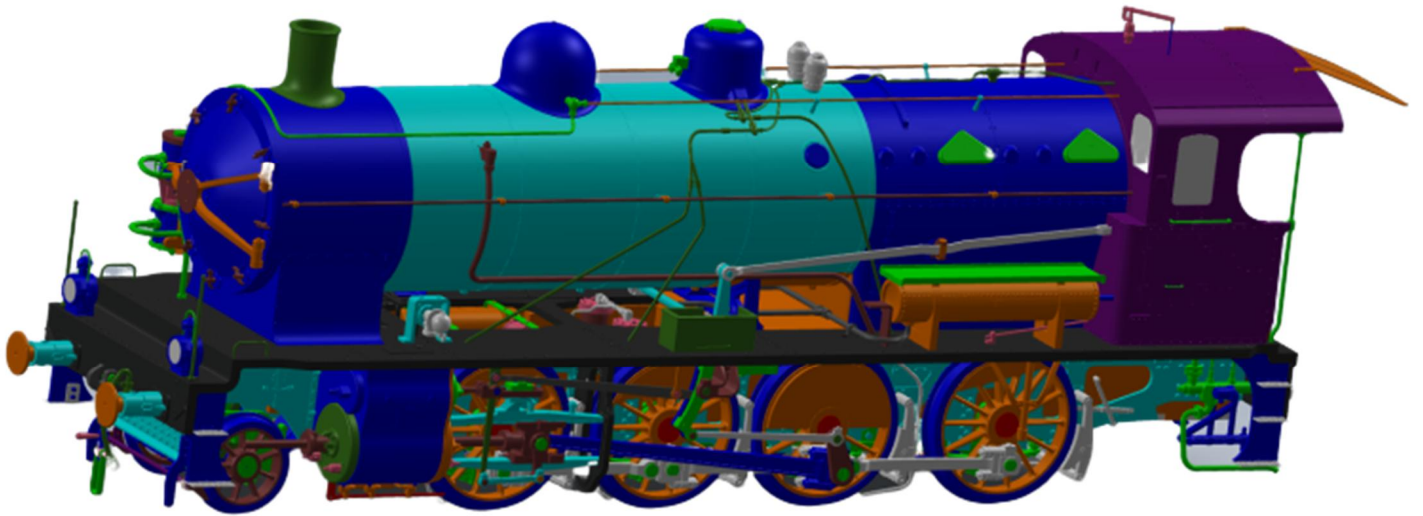

SNCF 1950

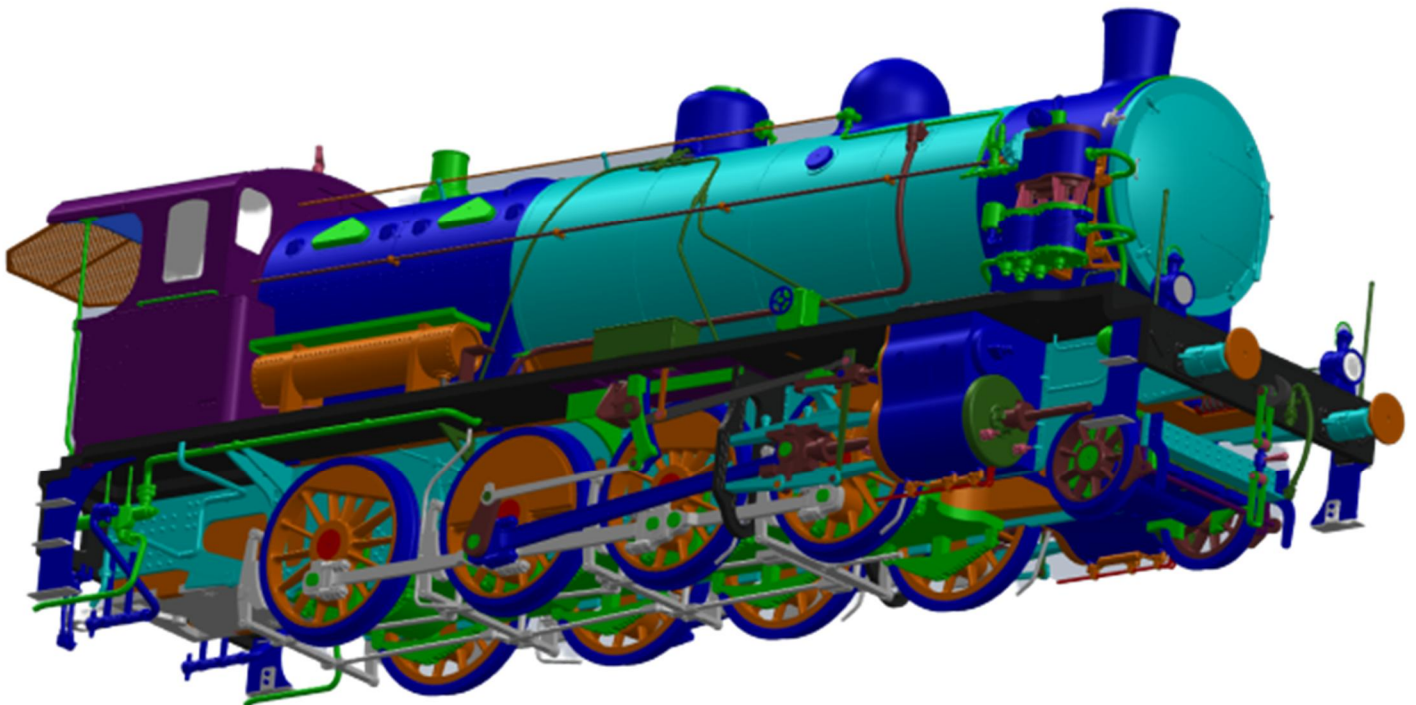

We sincerely hope that a lot of fans will support this project and buy one piece, in order to motorize it and realize their own model at a very nice price.

140C CHREZO

After the definitive approval of the design drawings at the end of August, the machining of the tools has now begun. A 3D printing of the complete machine and tender will be presented at Rail-Expo. Produced using state-of-the-art machines and based on the final files, this sample will allow everyone to appreciate the model final aspect.

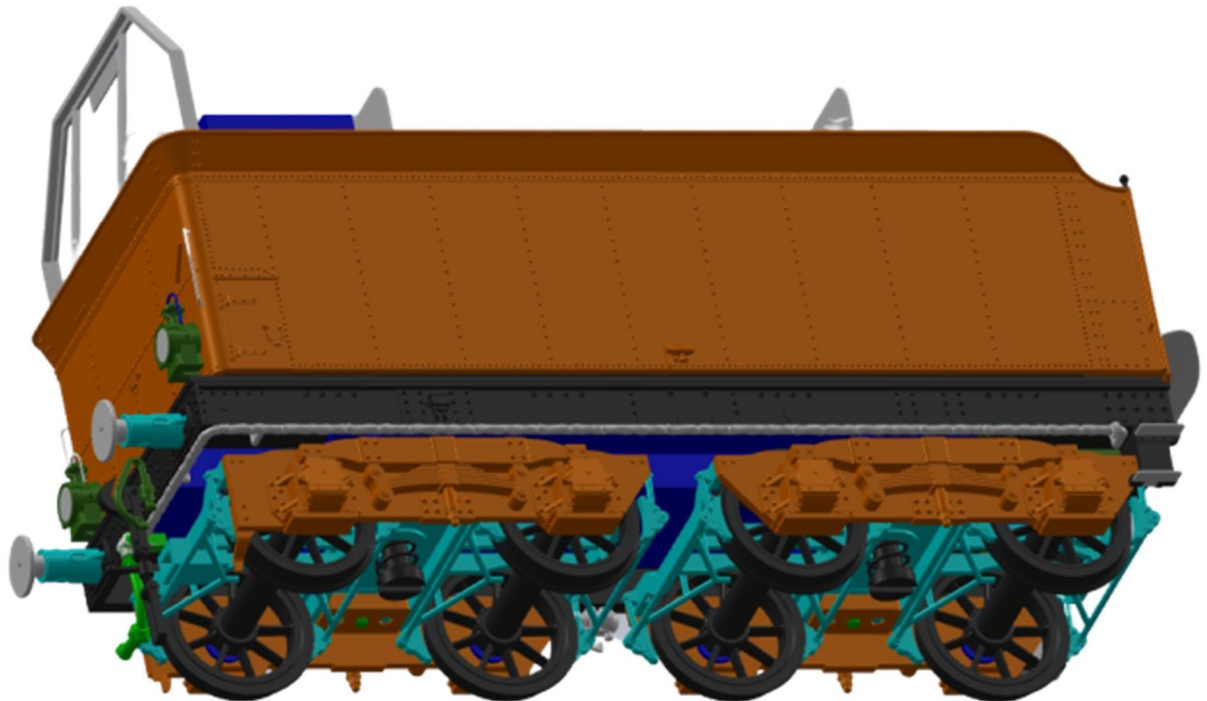

These two figures show the parts variations: flat or "North" smoke box door, North or Lemaître exhaust, Genuine or Coale safety valves.

New subscribers are welcome ! Please, support this project which received 255 orders from 2018, August 22th and help us to achieve our final goal: produce 800 models without any bank loan! Price 800€. the former subscribers benefit from their reservation price until the model delivery.

The 18m3 tender will be manufactured in two versions: West type on the left, East type below. Enjoy the specific shapes and arrangements of the danger arch or the chemical agent tank!

SHOWS AND EXHIBITIONS

CHREZO will welcome a surprise host on its stand during Rail-Expo. A clue :

Unfortunately, we cancelled our participation in Meursault show on 7 et 8 th of december.

Please, visit our eBay store <http://www.ebaystores.fr/duzeroalinfini> or our website www.chrezo.fr
